## IRIS

# THE BROOK GARDENS

H. J. BROOK, Prop.

Goodland,

Indiana

#### Foreword

During the past twelve years, we have acquired a large collection of Peonies and Irises, which has increased to such an extent that we are now offer-

ing our surplus stock for sale.

Each year we aim to check over our plantings to guard against untrue stock and offer our plants with the guarantee that they are true to name. We will replace any plant that might be sent out mis-labeled or refund the price paid.

#### Terms

Our terms are cash with order. All plants are sent postpaid, except where otherwise stated.

No order accepted for less than \$1.00.

With an order amounting to \$5.00 you may select plants amounting to .50, which will be sent you free.

With an order amounting to \$10.00, select plants

amounting to \$1.00.

With an order amounting to \$25.00, select plants

amounting to \$3.00.

With an order amounting to \$50.00, select plants

amounting to \$7.50.

Special prices on Quantities of same variety. Carrying charges not prepaid and the above discounts not applying.

25c Varieties, 3 for 50c, 6 for 85c, 12 for \$1.50.

35c Varieties, 3 for 70c, 6 for \$1.20, 12 for

fection.

\$3.00.

50c Varieties, 3 for \$1.00, 6 for \$1.70, 12 for

Ratings The figures placed before the names of the varieties are the Official ratings given by the American Iris Society; 100 being the standard of per-

#### Culture

Irises will grow to perfection if planted in good, well-drained, garden soil, exposed to full sun and thoroughly cultivated. If the soil needs enriching two tablespoonsful of bonemeal, thoroughly mixed with the soil, is sufficient for each plant. Plant about one inch deep. Irises of a single variety should be placed about twelve inches apart, while a mixed planting should be allowed eighteen to twenty-four inches.

Irises do best in raised beds that insure proper drainage. Crushed limestone mixed with the soil is very beneficial for all bearded iris. An application of lime keeps the soil sweet. The heavier soils are kept in a better condition by the liberal

use of lime.

Water sparingly and only during a very dry season. Too much moisture encourages root rot.
Plant any time after blooming season until

ground freezes, the earlier the better.

If interested in Peonies ask for our list.

To aid those who may wish some help in the

selection of varieties, we have made up the following collections;

	,				
1.	Albert Victor	.25	8.	Tineae	.25
2.	Mary Garden	.35	9.	Eldorado	.25
3.	Caprice	.25	10.	Florentina	.25
4.	Lohengrin	.35	11.	Mme. Chereau	.25
5.	Loreley .	.25	12.	Jacquesiana	.25
6.	Quaker Lady	.35	13.	Rose Unique	.25
7.	Queen of May	.25	14.	L. A. Williamson	.75
				_	
		\$2.05		\$4	4.30

We are sending the first seven of the above named varieties postpaid for \$1.00; the fourteen above named varieties sent postpaid for \$2.00.

THE BROOK GARDENS, H. J. Brook, GOODLAND, INDIANA.

#### Bearded Iris

—Afterglow (Sturt. 1917)—Soft grayish lavender
-Albert Victor (Barr)-Lavender and blue
—Albicans, Princess of Wales (Species)— White
—Alcazar (Vilmorin 1910)—Bluish violet and purple, large and tall
—Amas (Species)—Large blue and violet flower
—Ambassadeur (Vilmorin 1920)—Purple and Maroon
—Ambigue (Vilmorin 1916)—Smokey red and reddish brown
—Anna Farr (Farr 1913)—White with pale blue edge
—Anne Leslie (Sturt. 1917)—White and rich carmine
Anosia (Longfield 1925)—Rich brown and golden-red, distinctive
-Archeveque (Vilmorin 1911)-Violet and deep purple, rich
Argynnis (Williamson 1924)—Yellow and violet carmine
Arnols (Barr)—Clouded red purple
Asia (Yeld 1920)—Silvery lavender; reddish purple
l—Aurora (Foster 1909)—Pale lavender— pink
-Aurea (Jacques)-A clear yellow
-Australis-Tall blue and lavender flower
2—Azure (Bliss 1918)—Lavender-blue and deep purple
4—Ballerine (Vilmorin 1920)—Clear light blue
Beau Ideal (Sass 1924)—White with

1.50	83—Benbow (Bliss 1917)—Deep violet-blue self
.25	71—Blue Jay (Farr 1913)—Rich blue; late and tall
1.00	81—Blue Lagoon (Bliss 1919)—Light and dark blue
1.00	72—Bluet (Sturt. 1918)—Early pale blue
4.50	91—Brandywine (Farr 1920)Pale silvery blue
1.00	85—B. Y. Morrison (Sturt. 1918)—Lavender violet, with purple fall
.7	79—Camelot (Bliss 1918)—Creamy white with violet edge
.2	75—Caprice (Vilmorin 1904)—Reddish-purple self
1.0	89—Caterina (Foster 1909)—Large lavender self, tall
1.00	Cecile Minturn (Farr 1922)—Pink, a favorite
1.0	86—Cluny (Vilmorin 1920)—Lilac-blue, very
.7	80—Col. Candelot (Millet 1907)—Smokey copper and velvety crimson
1.0	Colias (Longfield 1925)—Opaque yellow
.9	Cora (Millet 1914)—Lavender purple, falls lined white, tall
1.0	87—Crusader (Foster 1913)—Violet blue, tall, fine
1.0	80—Dalila (Dennis 1914)—Flesh white, with reddish purple fall
.2	75—Dalmarius (G. & K. 1907)—Light laven- der-pink
.2	78—Dawn (Yeld 1911)—Pale sulphur yellow
1.0	83—Dejazet (Vilmorin 1914)—Bronze-rose reddish-violet, very good
1.0	83—Dimity (Bliss 1919)—White, veined mauve, good
.2	74—Dr. Bernice (Hooper 1867)—Bronze yellow and maroon
2.0	85—Dream (Sturt. 1919)—A lovely pink
1.0	86—Edouard Michel (Verdier 1904)—Rosy red self; tall, long season
5.0	Eglamour (Hort.) Very large purple bi-
2.0	E. H. Jenkins (Bliss 1919)—Steel blue
.2	78—Eldorado (Vilmorin 1910)—Yellowish- bronze, blended purple, distinct
.2	75—Empire (Sturt. 1918)—Warm deep yellow
	80—Fairy (Kennicott 1905)—White with deli-
